EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Amy Klann on 28 September 2004.

The application has been amended as follows:

Claim 53, add "wherein said fragment retains insecticidal activity" at the end of line 3, after "acids".

Claim 59, add "wherein said fragment retains insecticidal activity" at the end of line 3, after "49".

The amendment to recite insecticidal activity clarifies that the fragment is not an amino acid or small peptide; the specification discusses the activity of NH₂ terminal deletions on page 43, lines 22-25.

The following is an examiner's statement of reasons for allowance:

The terminal disclaimer filed on 7/02/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 5,495,071 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Art Unit: 1653
